

**Diagnostics and therapeutics for diseases associated with Homo Sapiens
Formyl Peptide Receptor-like 2**

Abstract of Disclosure

The invention provides a human FPRL2 which is associated with the cardiovascular diseases, cns disorders, hematological diseases, genito-urinary diseases, cancer and respiratory diseases. The invention also provides assays for the identification of compounds useful in the treatment or prevention of cardiovascular diseases, cns disorders, hematological diseases, genito-urinary diseases, cancer and respiratory diseases. The invention also features compounds which bind to and/or activate or inhibit the activity of FPRL2 as well as pharmaceutical compositions comprising such compounds.
